

Hofmann Maschinen und Anlagenbau GmbH

Your partner for balancing technology, tyre testing machines and wheel assembly lines

With more than 85 years of experience, Hofmann is a global player in the balancing technology market. With our product portfolio, we offer you custom-designed solutions for quality assurance. Our balancing service complements our product range perfectly. We assure our customers worldwide with the precision, reliability and highest quality of machines.

Hofmann Balancing Service – fast, precise and versatile

Every rotor has an imbalance, which can lead to noise, vibrations, increased wear and even destruction. To avoid this, balancing the rotors is necessary in most cases. With our experienced team, we guarantee you a competent balancing service, in which we can handle small rotors from a few grams to large rotors with a weight of up to 4.5 t and a length of up to 5.5 m. We put the requirements of our customers first and at the centre of our focus.

A selection of rotors that our balancing service team can balance for you:

- Rollers
- Belt pulleys
- Fan impellers
- Differential housings
- Electric armatures
- Flanges
- Crankshafts
- Pump rotors
- Gear wheels
- Flywheels
- Turbine wheels
and much more...
