

Hofmann Maschinen- und Anlagenbau GmbH is a globally active company in special mechanical engineering. At our site in Worms we develop and produce machines of balancing technology as well as turnkey assembly systems for tyres and wheels and take in a worldwide leading position due to our applied high quality standards. The close and long lasting partnership to CEMB S.p.A in Mandello del Lario – manufacturer of standardized balancing machines - successfully rounds off the broad portfolio with technically challenging products at Hofmann.
